11 MAY 1966

Mr. H. E. Hampton
Director of Government Communications
Chesapeake and Potomac Telephone Company
930 H Street, Northwest
Washington, D. C.

Dear Mr. Hampton:

Reference is made to recent discussions between Mr. H. E. Hamilton of your company and representatives of this office relative to the projection of this Agency's telephone facilities requirements and space requirements incident thereto.

The purpose of this letter is to outline and project these requirements in order that you may proceed with the required preliminary engineering and planning necessary to the provision of these services.

Attached hereto are the present and projected future requirements together with specific cable characteristics.

At the present time, space available for the housing of additional facilities is practically exhausted. With this in mind, it is requested that you submit a detailed diagrammatic layout indicating the types, dimensions, and weights of equipment that will be required in order to provide these services as outlined on the attachment in accordance with their respective time frames.

It is my understanding that efforts are being made to alleviate the present shortage of carrier equipment and battery supply which will enable us to meet our on-hand requirements for broadband off-premises services. This service is urgently needed and your personal interest in this matter will be greatly appreciated.

If there is a need for additional information regarding this matter, it is requested that you contact [redacted] of this office on 351-5656. 25X1A

Sincerely yours,

Signed: [redacted] 25X1A

[redacted] 25X1A
Acting Director of Logistics
